

Energy Bill

Energy Bill Details

President Bush and Congress just passed an Energy Bill on July 29, 2005 that will give a tax incentive credit of up to \$300 to all homeowners nationwide who purchase a highly efficient water heater in 2006 and 2007. This bill was passed in an effort to address the nation's ongoing energy crisis.

Incomparable Product Lineup

Takagi's tankless water heaters hold some of the highest energy factor rates in the industry averaging 0.81 to 0.94. According to the Department of Energy, the energy factor must be a minimum of 0.80 to qualify for the tax credit. Takagi offers six exceptional models that all meet and exceed these qualifications, saving you "more money".

Tax Credit Information

Beginning in tax year 2006, consumers will be able to itemize purchases on their federal income tax form, which will lower the total amount of tax they owe the government. Pre-existing homes built in 2005 or earlier will be eligible for Tax Credits of up to \$500. **Visit the Department of Energy for more information** <http://www.energy.gov/taxbreaks.htm> **Please consult a tax professional for more info.**

Product Category	Product Type	Tax Credit Specification	Tax Credit
HVAC	Gas, oil, propane water heater	Energy Factor 0.80	\$300

Consumer Benefits

- Save Money -- A Takagi Tankless Water Heater pays for itself in many ways. Because it activates only when there is actual demand for hot water, homeowners save up to 50% on energy usage.
- Save Energy -- Without a whole tank to heat up round-the-clock, a Takagi will burn less fuel and emit fewer pollutants.
- Save Space -- A Takagi saves space too, thanks to the unique ability to be hung on a wall virtually anywhere... even outdoors in warmer climates.

Additional Tax Credits

There are additional proponents that address new construction, residential, and commercial installations not yet published. Please reference the website www.energytaxincentives.org as the information evolves.
